

GNOME Remote Desktop op Ubuntu

Install the necessary software:

```
apt install gnome-remote-desktop freerdp2-wayland winpr-utils
```

Enable via GUI (Recommended for most users) Open Settings from the system menu (top-right corner). Go to Sharing in the sidebar. Toggle on Remote Desktop.

Configure the Username and Password (these can be different from your system account). Ensure Remote Control is enabled to allow full interaction. ⚠ Note: If the first connection fails, restart the service:

```
systemctl --user restart gnome-remote-desktop.service
```

try headless:

```
sudo grdctl --headless
```

open the rdp port in the firewall:

```
sudo ufw allow 3389/tcp
```

Reload the firewall to apply changes:

```
sudo ufw reload
```

Disable screenlock disconnect:

```
gsettings set org.gnome.desktop.session idle-delay 0
```

```
gsettings set org.gnome.settings-daemon.plugins.power sleep-inactive-ac-timeout 0
```

disable login logout:

```
sudo apt install gnome-shell-extension-manager
```

Open Extension Manager and install "Allow Locked Remote Desktop".

Start the remote desktop:

```
sudo systemctl enable --now gnome-remote-desktop.service
```
