

GNOME Remote Desktop op Ubuntu

Install the necessary software:\

```
apt install gnome-remote-desktop freerdp2-wayland winpr-utils
```

Create and configure the TLS certificate: `sudo -u gnome-remote-desktop mkdir -p ~gnome-remote-desktop/.local/share/gnome-remote-desktop` `sudo -u gnome-remote-desktop winpr-makecert -silent -rdp -path ~gnome-remote-desktop/.local/share/gnome-remote-desktop rdp-tls`

```
sudo grdctl -system rdp set-tls-key ~gnome-remote-desktop/.local/share/gnome-remote-desktop/rdp-tls.key  
sudo grdctl -system rdp set-tls-cert ~gnome-remote-desktop/.local/share/gnome-remote-desktop/rdp-tls.crt  
sudo grdctl -system rdp set-credentials "abel" "Celpq11"
```

```
grdctl -system rdp enable systemctl -now enable gnome-remote-desktop.service
```

```
grdctl -headless
```

open the rdp port in the firewall: `sudo ufw allow 3389/tcp` Reload the firewall to apply changes: `sudo ufw reload`
