

MariaDB

Installeer MariaDB en start deze nu en in de toekomst:

```
yum install mariadb-server mariadb
systemctl enable mariadb.service
systemctl start mariadb.service
```

verwijder de defaults en set een mysql administrator password:

```
mysql_secure_installation
```

```
Enter current password for root (enter for none):
Set root password? [Y/n] Y
Laeltip0rus
Remove anonymous users? [Y/n] Y
Disallow root login remotely? [Y/n] Y
Remove test database and access to it? [Y/n] Y
Reload privilege tables now? [Y/n] Y
```

om de database alleen op de server zelf te laten luisteren pas je de file `/etc/my.cnf` aan en zet hierin:

```
bind-address = 127.0.0.1
```
