

Nextcloud on rocky9

install snap and start it: `systemctl enable --now snapd`

install nextcloud:

```
snap install nextcloud
```

```
make an extra disk for the nextcloud data: vgscan pvcreate /dev/vdb1 vgcreate vg_data  
/dev/vdb1 lvcreate -n lv_nextdata -l 100%FREE vg_data mkfs.xfs  
/dev/mapper/vg_data-lv_nextdata mkdir -p /media/nextcloud/data
```

```
snap connect nextcloud:removable-media nextcloud.occ maintenance:install --data-dir  
/media/nextcloud/data --admin-user admin nextcloud.occ maintenance:install --admin-user admin
```

```
nextcloud.occ maintenance:mode --on cp -ar /var/snap/nextcloud/common/nextcloud/data/  
/media/nextcloud nextcloud.occ config:system:set datadirectory --value=/media/nextcloud/data  
nextcloud.occ config:system:set datadirectory --value=/var/snap/nextcloud/common/nextcloud/data vi  
/var/snap/nextcloud/current/nextcloud/config/config.php
```
