

Upgrade Gluster Node van CentOS7 naar CentOS8

Stel je hebt een 3 node Gluster cluster, node1 node2 en node3, en je wilt die upgraden van CentOS7 naar CentOS8.

ID's, node en cluster gegevens veilig stellen

mountpoints:

```
mount | grep '^/' | grep -i gluster
```

```
/dev/mapper/gluster_vg-gluster_lv_backup on  
/GLUSTERFS/diskA/gluster_lv_backup type xfs  
(rw,relatime,seclabel,attr2,inode64,noquota)  
/dev/mapper/gluster_vg-gluster_lv_vmstore on  
/GLUSTERFS/diskA/gluster_lv_vmstore type xfs  
(rw,relatime,seclabel,attr2,inode64,noquota)  
/dev/mapper/gluster_vg-gluster_lv_data on /GLUSTERFS/diskA/gluster_lv_data  
type xfs (rw,relatime,seclabel,attr2,inode64,noquota)
```
