

connect OpenCode to VSCodium

VSCodium is a community-driven, fully open-source binary distribution of Visual Studio Code (VS Code), built from the same open-source repository (Code-OSS) but without Microsoft's proprietary components.

opencode plugin

The opencode plugin by SST is available in the Open VSX Registry search for opencode and install opencode for vscode from SST.

link to binary

That plugin is not aware of the path to the binary installed with the curl command, so we need to create a link
