

connect OpenCode to VSCodium

VSCodium is a community-driven, fully open-source binary distribution of Visual Studio Code (VS Code), built from the same open-source repository (Code-OSS) but without Microsoft's proprietary components.

opencode plugin

The most used opencode plugins for VSCode have issues when installed in VSCodium except ***OpenChamber***.

install OpenChamber plugin

in the left sidebar select **Extentions(Ctrl+Shift+X)** in the search bar type *OpenChamber*

link to binary

That plugin is not aware of the path to the binary installed with the curl command, so we need to create a link
